

Spreading The Word About Tap Water Quality

Tap water. You turn on the faucet, it's always there. It may be taken for granted, but tap water quality, convenience and value is not taken lightly by the people who ensure it is safe and available when you want it.

The safety, convenience and affordability of tap water is the message being communicated by "Tap Into Quality," a public education campaign designed to keep citizens informed about the quality of their tap water.

Valley cities, the Arizona Department of Environmental Quality, Maricopa County Environmental Services, the Central Arizona Project (CAP) and Salt River Project (SRP) have teamed up to educate citizens about their tap water.

Up to 100 tests a day are performed on the drinking water you receive at your home or business. These tests are repeated day after day to make sure your water meets every health and safety standard set by the state and federal government.

In terms of value, you can fill more than five one-gallon jugs with water from your tap for just one penny.

As with many other drinks, your tap water may taste better if chilled, so fill a pitcher with water and stick it in your refrigerator ...or add a thin slice of lemon or lime for a different taste.

People may have other preferences regarding drinking water. That's all right. We just want to make sure they are making an informed decision.

More Information

Federal law requires that once each year, suppliers of tap water send you a report about the quality of your tap water. This Water Quality Report includes valuable information about your drinking water, its source and quality. If you would like a copy of this report, or have specific questions about your water or water quality, contact your water provider.

For general information about water quality, visit our web site:

www.tapintoquality.com

You'll find a consumer survey, events calendar, community education messages and links to city web sites containing copies of their Water Quality Reports.

Tap Into Quality is affiliated with the Arizona Water & Pollution Control Association, a non-profit organization dedicated to professional and public education and awareness on issues related to Arizona's drinking water, water use and environmental resources management.

Affordable

One penny is all you pay for five gallons of fresh tap water. You won't find a better value for quality water when you need to quench your thirst fast. You may even want to add a slice of lemon, orange or lime to give it a fresh citrus flavor.

Convenient

There's nothing easier than getting a drink of tap water. With a turn of the tap, you get a supply of refreshing water to quench your Arizona thirst. For a cooler treat, fill and chill a pitcher of water in your refrigerator.

Safe & Tested

More than 100 tests are performed on your tap water each day to ensure it is always completely safe to drink. The Valley's tap water must meet all standards set by the Environmental Protection Agency (EPA), Maricopa County Environmental Services and the Arizona Department of Environmental Quality (ADEQ). Valley water providers are committed to maintaining the safety and quality of your tap water.

So if you want the quickest and easiest way to get quality drinking water ... **Tap into Quality** ... the convenience of tap water.
